

Press Release (smart2i on OWL-Booth Hannover Fair 2024)

## **Hymmen with smart2i at Hannover Fair**

**Bielefeld, 03/27/2024** – *Effective production controlling, complete transparency with intelligent analyses: This is made possible by the smart2i Industry Intelligence solution for interlinked production processes, which Hymmen is presenting for the first time this year at the OWL -booth from April 22-26 at the Hannover Fair in Hall 7, Stand D27.*

### **smart2i - more added value than with MES**

The Industry Intelligence solution from Hymmen ensures production companies effective production controlling with the support of intelligent analyses for data-based decisions. The software offers you added value in several respects:

- Simple and intelligent analyses ensure a transparent overview of your production process and its influencing factors. You can intervene at any time and from anywhere.
- Fine-grained quality control and long-term traceability of data enable you to ensure better product quality.
- Optimum utilization of your machines and production resources ensures greater profitability.
- With the help of smart2i, new production systems can be connected and put into operation faster and with less effort.

### **Live demonstration of the software solution**

At the Hymmen/smart2i stand at the OWL stand at the Hannover Messe, our smart2i team will explain to you how effective production controlling works with our Industry Intelligence solution using intelligent analyses of interlinked production processes.

For demonstration purposes, you can follow a virtual production on a monitor. The data is documented live on dashboards. Accessible 24/7 from any end device, the data is continuously stored in a cloud. Evaluation results of the analyses of data correlations and interdependencies are presented in easy-to-understand graphics. Finally, adjustments to the virtual production process can be made in real time via the real control panel on the exhibition stand. And you can immediately follow the effects on the screen!

### **34 exhibitors present their innovations at the OWL booth**

How can technologies such as artificial intelligence help us to work more sustainably and produce more sustainably? This is the question posed by the leading-edge cluster it's OWL. It's OWL is presenting new digital solutions for sustainable products, sustainable business processes and a sustainable working environment under the motto 'Industry.Zero' at the Hannover Messe from April 22 to 26.

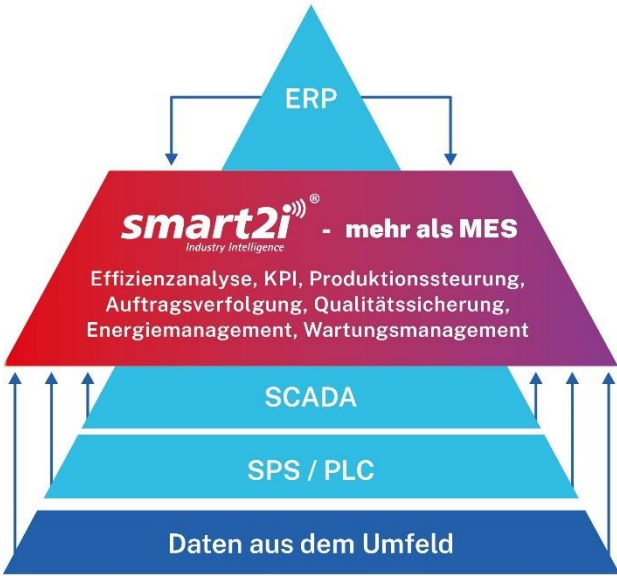

At the joint OWL stand, which is organized by OstWestfalenLippe GmbH, owl maschinenbau and it's OWL, 34 companies, research institutions and networks will be showcasing solutions and experiences from the OstWestfalenLippe region. The spectrum ranges from AI and machine learning, smart manufacturing, intelligent energy supply and circular value creation to networked mobility and the working world of the future. And Hymmen is there with smart2i!

Experience the future of industry with smart2i at Hannover Messe 2024. We look forward to seeing you!
